

## Cranbrook Primary School- Progression in Maths – Fractions including Decimals and Percentages

Purpose of study –Mathematics is a creative and highly interconnected discipline that has been developed over centuries, providing the solution to some of history’s most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject.

### Aims

The national curriculum for mathematics aims to ensure that all pupils:

- become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately
- reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
- can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions

Mathematics is an interconnected subject in which pupils need to be able to move fluently between representations of mathematical ideas. The programmes of study are, by necessity, organised into apparently distinct domains, but pupils should make rich connections across mathematical ideas to develop fluency, mathematical reasoning and competence in solving increasingly sophisticated problems. They should also apply their mathematical knowledge to science and other subjects.

The expectation is that the majority of pupils will move through the programmes of study at broadly the same pace. However, decisions about when to progress should always be based on the security of pupils’ understanding and their readiness to progress to the next stage. Pupils who grasp concepts rapidly should be challenged through being offered rich and sophisticated problems before any acceleration through new content. Those who are not sufficiently fluent with earlier material should consolidate their understanding, including through additional practice, before moving on.

Intent

## Cranbrook Primary School- Progression in Maths – Fractions including Decimals and Percentages

We want our children to become **confident and articulate communicators** by enriching their mathematical vocabulary. We aim to enrich our pupils learning with a deep and confident understanding in fluency and reasoning. We aspire for our children to appreciate the power of mathematics and build a **life-long passion for maths** by exploring their curiosity through **memorable learning experiences**. As the children progress we aim to build confidence, **widen their horizons** and attain a positive growth mind set. Through our enterprise scheme we will provide children with an opportunity to develop their **global identity** through working with the local community. We want them to know that mathematics is essential to succeed in life and necessary for financial responsibilities and most forms of employment.

### FRACTIONS

Area of Study	1	2	3	4	5	6
COUNTING IN FRACTIONAL STEPS			<i>Pupils should count in fractions up to 10, starting from any number and using the <math>\frac{1}{2}</math> and <math>\frac{2}{4}</math> equivalence on the number line (Non Statutory Guidance)</i>	Count up and down in tenths	Count up and down in hundredths	
			Spot the mistake 7, $7\frac{1}{2}$ , 8, 9, 10	Spot the mistake six	Spot the mistake	Spot the mistake

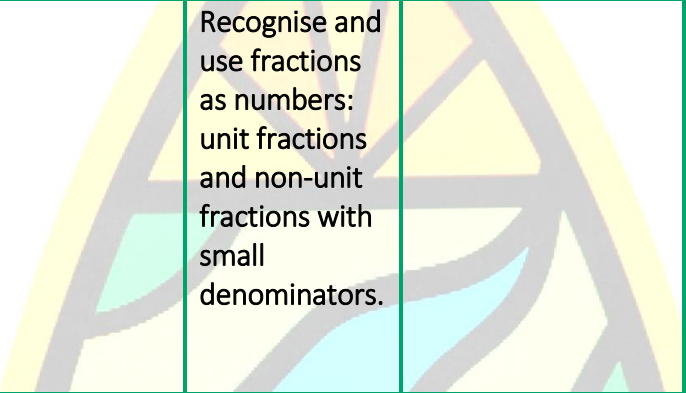

Cranbrook Primary School- Progression in Maths – Fractions including Decimals and Percentages

			<p><math>8\frac{1}{2}</math>, 8, 7, <math>6\frac{1}{2}</math>, ... and correct it</p> <p><b>What comes next?</b>  <math>5\frac{1}{2}</math>, <math>6\frac{1}{2}</math>, <math>7\frac{1}{2}</math>, .....,                      ....  <math>9\frac{1}{2}</math>, 9, <math>8\frac{1}{2}</math>, .....,                      .....</p>	<p>tenths, seven tenths, eight tenths, nine tenths, eleven tenths ... and correct it.</p> <p><b>What comes next?</b>  <math>\frac{6}{10}</math>, <math>\frac{7}{10}</math>, <math>\frac{8}{10}</math>, ....., ....  <math>\frac{12}{10}</math>, <math>\frac{11}{10}</math>, ....., ....., .....</p>	<p>sixty tenths, seventy tenths, eighty tenths, ninety tenths, twenty tenths ... and correct it.</p> <p><b>What comes next?</b>  <math>\frac{83}{100}</math>, <math>\frac{82}{100}</math>, <math>\frac{81}{100}</math>, ....., ....., .....</p> <p><math>\frac{31}{100}</math>, <math>\frac{41}{100}</math>, <math>\frac{51}{100}</math>, ....., .....</p>	<p>0.088, 0.089, 1.0</p> <p><b>What comes next?</b>                      1.173, 1.183, 1.193</p>	<p>Identify and explain mistakes when counting in more complex fractional steps</p>
Area of Study		1	2	3	4	5	6
RECOGNISING FRACTIONS		Recognise, find and name a half as one of two equal parts of an object, shape or quantity	Recognise, find, name and write fractions $\frac{1}{3}$ , $\frac{1}{4}$ , $\frac{2}{4}$ and $\frac{3}{4}$ of a length, shape, set of objects or quantity.	Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators	Recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence)	

Cranbrook Primary School- Progression in Maths – Fractions including Decimals and Percentages

				Recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10.			
		<p><b>What do you notice?</b></p> <p>Choose a number of counters. Place them onto 2 plates so that there is the same number on each half. When can you do this</p>	<p><b>What do you notice?</b></p> <p><math>\frac{1}{4}</math> of 4 = 1  <math>\frac{1}{4}</math> of 8 = 2  <math>\frac{1}{4}</math> of 12 = 3                  Continue the pattern What do you notice?</p>	<p><b>What do you notice?</b></p> <p><math>\frac{1}{10}</math> of 10 = 1  <math>\frac{2}{10}</math> of 10 = 2  <math>\frac{3}{10}</math> of 10 = 3                  Continue the pattern.                  What do you notice?</p> <p>What about <math>\frac{1}{10}</math> of 20?                  Use this to work out <math>\frac{2}{10}</math> of 20, etc.</p>	<p><b>What do you notice?</b></p> <p><math>\frac{1}{10}</math> of 100 = 10  <math>\frac{1}{100}</math> of 100 = 1  <math>\frac{2}{10}</math> of 100 = 20  <math>\frac{2}{100}</math> of 100 = 2</p> <p>How can you use this to work out <math>\frac{6}{10}</math> of 200?  <math>\frac{6}{100}</math> of 200?</p>	<p><b>What do you notice?</b></p> <p>One tenth of £41                  One hundredth of £41                  One thousandth of £41</p> <p>Continue the pattern What do you notice?</p> <p><math>0.085 + 0.015 = 0.1</math>  <math>0.075 + 0.025 = 0.1</math></p>	<p><b>What do you notice?</b></p> <p>One thousandth of my money is 31p. How much do I have?</p>

Cranbrook Primary School- Progression in Maths – Fractions including Decimals and Percentages

		and when can't you? What do you notice?				$0.065 + 0.035 = 0.1$ Continue the pattern for the next five number sentences.	
		Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.		Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators.			
		<b>True or false?</b> Sharing 8 apples between 4 children means each child has 1 apple.	<b>True or false?</b> Half of 20cm = 5cm $\frac{3}{4}$ of 12cm = 9cm	<b>True or false?</b> $\frac{2}{10}$ of 20cm = 2cm $\frac{4}{10}$ of 40cm = 4cm $\frac{3}{5}$ of 20cm = 12cm	<b>True or false?</b> $\frac{1}{20}$ of a metre = 20cm $\frac{4}{100}$ of 2 metres = 40cm	<b>True or false?</b> 0.1 of a kilometre is 1m. 0.2 of 2 kilometres is 2m. 0.3 of 3 Kilometres is 3m 0.25 of 3m is 500cm.  $\frac{2}{5}$ of £2 is 20p	<b>True or false?</b> 25% of 23km is longer than 0.2 of 20km. Convince me.
