

EQUITY FOR ALL

Cranbrook
Primary School

Design and Technology Intent

At Cranbrook, we believe Design and Technology will equip pupils with knowledge and **critical thinking skills** in preparation for lifelong learning. Children will draw on the discipline of STEM subjects to **reflect and evaluate** existing work, and then **be inspired to invent and design** products that solve problems in a range of contexts.

Pupils will learn how to take risks and become resourceful, innovative, **capable citizens** ready for the wider world. By encouraging pupils to evaluate work and designs from notable designers, including those from diverse backgrounds, we aim to foster children's **cultural capital** and a lifelong passion for innovation and enterprise, particularly in relation to projects linked to the local environment.
